Infrastructure creates:

Thompson Regional Airport

CIB BIC | Canada Infrastructure Bank

CIB investment
$52M

Jobs enabled
~640

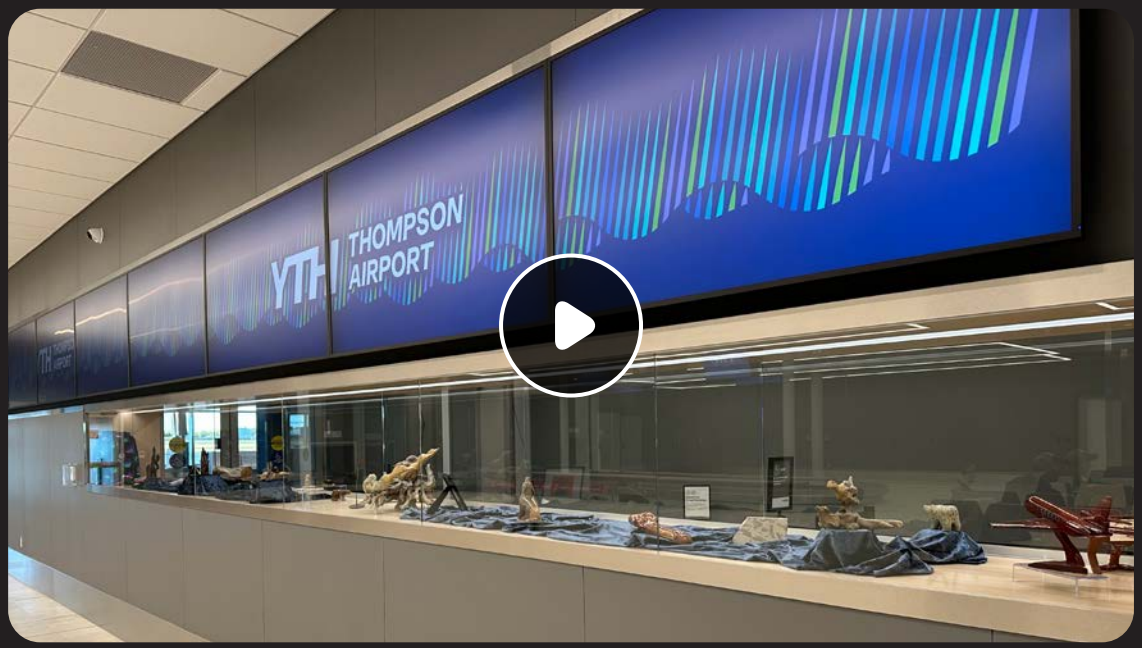
Private investment
$17.5M

Regional catchment ~65,000 people

Supports ~410 passenger trips per day

Moves
~41,600
tonnes of cargo annually

The redevelopment of Thompson Regional Airport strengthens a vital gateway for communities in northern Manitoba and western Nunavut. The old terminal, built on discontinuous permafrost, faced ongoing foundation issues intensified by climate change. The new terminal provides more reliable access to essential goods and services while supporting economic development for northern and remote communities.



Infrastructure creates: Thompson Airport

Discover the full story

Other benefits

- Connects 15 remote Indigenous communities which face limited transportation options
- Provides a long-term transportation solution resilient to the impacts of climate change
- Positions Thompson Regional Airport to support future critical minerals exploration
