

# Infrastructure Creates—YYC Calgary International Airport Aviation Hub

CIB  BIC

Canada  
Infrastructure  
Bank

CIB investment:

**\$172M**

GDP impact:

**\$342M**

Private capital:

**\$120M**

Jobs enabled:

**160** new permanent, high-skilled jobs  
and **150** workers to support construction

Improving Canada's aviation infrastructure is essential to strengthening our economic competitiveness. At Calgary International Airport, construction is underway on YYC AeroNex, a strategic centre for aviation services and innovation. Canadian airlines will benefit from a world-class, domestic aviation maintenance hub with competitively priced support and training services. By advancing aviation infrastructure, we are creating high-skilled, well-paid jobs, enhancing access to education and training opportunities, and supporting growth in the local economy.

Infrastructure Creates—YYC Calgary International  
Airport Aviation Hub

## Other benefits

- » Three partnerships with local education institutions to develop new aviation training programs
- » 150,000 square foot, first-of-its-kind test cell facility operated by Lufthansa Technik Canada
- » Creates direct jobs in roles such as engineers, engine mechanics, technical trainers and aviation project management
- » Supports indirect employment in construction, hospitality and transportation
- » New training centre of excellence that will bring pilot training and academic research under one roof
